

What is evidence- based or science based instruction?

Using, teaching methods and strategies that have been proven to work via rigorous, systematic and objective procedures. Such methods and strategies have been accepted by peer-reviewed journals or independent experts.

Evidence based strategies and methods MSL supports and uses include:

- * Segmenting complex skills.
- * Drawing students attention by modeling or thinking aloud.
- * Promote engagement via systematic faded supports and prompts.
- * Provide opportunity for student to respond and receive feedback.
- * Create purposeful practice opportunities.
